AastraLink RP™
A Microsoft® Response Point™ Phone System

IP-PBX

AastraLink RP, a Microsoft® Response Point™ phone system, is a powerful, easy to use communications solution for Small Business

Aastra, a global company at the forefront of the Enterprise Communication market, has leveraged many years of experience in the analog, digital and IP terminal business to develop the AastraLink RP communications solution for Small Business. Powered by Microsoft Response Point phone system software, the AastraLink RP system is specifically designed to provide the Small Business market with a simple, complete telephone solution in a compelling and affordable package.

Targeted for 50 users and under, the system is comprised of three components; an Aastra designed Base Unit, Gateway and new Aastra Response Point IP phones. With features such as auto-discovery and auto-configuration, setting up or changing the system can be done easily by an average PC user in minutes. For users, a voice-enabled user interface, advanced call routing, built-in voice mail, Automated Receptionist and contact integration with Microsoft Office Outlook® offer simplified access to advanced large scale PBX features.

The AastraLink RP solution offers:

- Sleek and stylish enterprise-grade, carrier quality phone system
- A choice of three different telephones, including a cordless model and optional expansion modules
- Voice-enabled user interface simplifying call management
- Support for voice calls using both traditional phone service and Voice over IP
- An easy way to reduce phone system management costs

See what a telephone system specifically designed for Small Business can do for your customers.
